EDUCATION

B.Tech – Computer Engineering
LAUTECH, Ogbomoso
2022 – 2027 (In View)

TECHNICAL SKILLS

Frontend:
HTML5, CSS3, JS (ES6+), React, Next.js, DOM Manipulation

Backend:
Java (Intermediate), Python (Intermediate), REST APIs (Intro)

Mobile:
Android Development (Kotlin, Android Studio, Gradle)

Tools:
Git, GitHub, VS Code

AI & Workflow:
Code optimization with LLMs (ChatGPT, Gemini).

Currently Learning:
Android Development (Kotlin), Data Structures & Algorithms (LeetCode)

LANGUAGES & VOLUNTEER

English: Fluent
Yoruba: Native

Volunteer: Tech community events and coding bootcamps.

Hobbies: Animation, Tech Blogging, Open Source.

PROFILE SUMMARY

Computer Engineering student and Software Engineer with strong hands-on experience building logic-driven web applications. Highly skilled in HTML, CSS, JavaScript, and React, with a proven track record of building dynamic, API-integrated platforms. Currently completing my SIWES at the Oyo State Secretariat, blending enterprise IT infrastructure experience with modern frontend development. Known for a disciplined workflow with 300+ GitHub contributions in 2025 and continuous open-source project development.

EXPERIENCE

IT Support & Networking Intern (SIWES) |

Management Information Centre (MIC), Governor's Office, Oyo State Secretariat

- Undergoing practical training in IT operations with a primary focus on enterprise network infrastructure and Cisco networking fundamentals.
- Work alongside system engineers to maintain computer hardware, troubleshoot physical networks, and execute OS/software installations.
- Provide cross-departmental field support, resolving live system issues and ensuring maximum uptime for government workstations.

Frontend Developer Intern |

Google Developer Groups On Campus (GDGOC) LAUTECH

- Collaborating within the engineering team to build community-focused web applications using Next.js and JavaScript (ES6+).
- Facilitating technical workshops and "Study Jams" for student developers, bridging the gap between theory and practical software engineering.
- Optimizing platform accessibility and user engagement through high standards for UI/UX and frontend performance.

Founder & Creative Branding Animator | *Power Creative Network*

- Created 2D & 3D animations and visual branding campaigns to help businesses communicate effectively.
- Combined technical thinking with creative UI/UX principles for digital storytelling.

SELECTED PROJECTS

MindXam [View Live]

- Built a dynamic web-based quiz application utilizing the Open Trivia DB API to fetch and render real-time trivia questions.
- Handled state management and dynamic DOM updates using modern JavaScript logic for a seamless user experience.

Real-Time Weather App [View Live]

- Developed a responsive weather dashboard that integrates live external weather APIs.
- Engineered a dynamic UI feature allowing users to toggle seamlessly between temperature units.

PurchasePalace (In Progress) [View Live]

- Designed a responsive e-commerce interface with structured product layouts, focusing on scalability and UI/UX optimization.

Budget Tracker [View Live]

- Developed a real-time financial tracking app using JavaScript for dynamic income and expense calculations, and UI updates.

Utility Apps: [View GitHub]
Built a Task Manager, Digital Library Manager, Interactive Greeting Card, Responsive Auth UI, Logic Calculator, and tic tac toe to practice advanced DOM manipulation.

ADDITIONAL INFORMATION

• Strong willingness to learn, improve, and collaborate effectively within fast-paced tech environments.
