EDUCATION

B.Tech – Computer Engineering
LAUTECH, Ogbomoso
2022 – 2027 (In View)

TECHNICAL SKILLS

Frontend:
HTML5, CSS3, JS (ES6+), React, DOM Manipulation

Backend:
Java (Intermediate), Python (Intermediate), REST APIs (Intro)

Mobile:
Android Development (Kotlin, Android Studio, Gradle)

Tools:
Git, GitHub, VS Code

AI & Workflow:
Code optimization with LLMs (ChatGPT, Gemini).

Currently Learning:
Android Development (Kotlin), Data Structures & Algorithms (LeetCode)

LANGUAGES & VOLUNTEER

English: Fluent
Yoruba: Native

Volunteer: Tech community events and coding bootcamps.

Hobbies: Animation, Tech Blogging, Open Source.

PROFILE SUMMARY

Computer Engineering student and Software Engineer with strong hands-on experience building logic-driven web applications. Skilled in JavaScript, React, and backend fundamentals, with projects in fintech-adjacent systems like budget tracking and interactive platforms. Known for consistency and curiosity with 350+ GitHub contributions in 2025 and continuous project development.

EXPERIENCE

Creative Branding Animator | *Power Creative Network*

- Created 2D & 3D animations and branding campaigns to help businesses communicate effectively.
- Combined technical thinking with creativity for digital storytelling.

Self-Directed Software Development

- Built logic-driven web apps (React, JavaScript).
- Practiced backend fundamentals (Python, Java, APIs).
- Maintained a disciplined development workflow, consistently building and improving functional applications.

SELECTED PROJECTS

MindXam [View Live]

- Built a dynamic exam platform with real-time question navigation and user interaction logic using JavaScript.
- Designed structured UI flow for seamless exam experience.

PowerStore (In Progress) [View Live]

- Designed a responsive e-commerce interface with structured product layout and UI interactions.
- Focused on scalability and user experience for online shopping systems.

Budget Tracker [View Live]

- Developed a real-time financial tracking app using JavaScript for dynamic income and expense calculations.
- Implemented logic for balance updates and user input handling.

Digital Library Manager [View Live]

- Built a library management interface for organizing and displaying book data.
- Applied JavaScript logic for dynamic content rendering.

Utility Apps: [View GitHub]
Built a Task Manager, Interactive Greeting Card, Responsive Auth UI, Logic Calculator, and tic tac toe to practice advanced DOM manipulation.

ADDITIONAL INFORMATION

• Actively seeking SIWES / Industrial Training (IT) and other relevant internship opportunities in software, IT systems, or fintech environments.
• Strong willingness to learn, improve, and collaborate effectively.
